SUMMARY

AI-focused product professional with hands-on experience across conversational AI and RAG systems. Skilled in prompt engineering, AI evaluation, user needs analysis, cross-functional collaboration, and go-to-market execution.

EXPERIENCE

Business Development & Solutions Engineer — ZBS POS

Dec 2025 – Present

Brooklyn, NY (Hybrid)

- Led market development and customer acquisition for restaurant tech solutions including SaaS-POS, an AI ordering assistant, and delivery robots
- Engaged restaurant owners through in-person visits, cold outreach, and follow-ups to surface pain points such as labor costs and peak-hour order handling
- Presented product use cases, led product application training, and supported merchants through trials, onboarding, and basic deployment
- Collected frontline customer feedback and worked with the product team on improvements and go-to-market adjustments

AI Product Manager Intern — Xincheng AI

May 2024 – Sep 2024

Shanghai, China (Remote)

- Contributed to feature planning and product design for a conversational AI mental companion, focusing on interaction, engagement, and retention
- Analyzed user feedback and usage data to drive continuous iteration of dialogue flows and product features
- Collaborated with engineers to translate product requirements into implementable solutions

SELECTED PROJECTS

DocuBot — RAG Document Q&A Assistant

- Built a lightweight Retrieval-Augmented Generation system from scratch; benchmarked pure LLM generation, keyword search, and full RAG (illustrative: 68% fewer hallucinated answers vs. baseline, 92% accuracy on held-out set)
- Designed a safety guardrail that refuses to answer without supporting evidence

AegisBot — AI-Assisted Crisis Triage Prototype

- Built a dual-model triage system cross-validating rule-based and ML risk assessments, conservatively defaulting to the higher risk level
- Identified and documented 4 real failure modes through hands-on testing (illustrative prototype metrics)

OrderAI — AI Phone-Ordering SaaS Platform

- Owned early-stage product positioning, pricing strategy, and a multilingual (EN/ZH/ES/VI) landing page built with Next.js 14, React, and i18n using Claude Code

EDUCATION & CREDENTIALS

M.S. Software Engineering — Northern Arizona University, GPA 4.0/4.0 (May 2024)

CSPO — Scrum Alliance (Feb 2025)

AI Engineering — CodePath (expected Aug 2026)

Motivational Interviewing & Trauma-Informed Care — Guttman Community College, CUNY (expected Aug 2026)

SKILLS

AI & Claude: Claude API & Claude Code, Prompt Engineering, RAG Pipelines, Model Evaluation & Guardrails

Product: User Needs Analysis, PRD & Roadmapping, Cross-functional Collaboration, Agile/Scrum (CSPO), Go-to-Market Strategy

Technical: Next.js & React, i18n/Localization, Python, SQL & Data Analysis
